

## Why NRG Works?

**We live in a toxic world.**

Unfortunately the world we live in today is not the same place it was two hundred years ago.

**Today we live in a toxic world.** From food preservatives to car exhaust to chemical cleaning supplies...these toxins are found in every part of our lives.

**Environmental toxins have become the leading source of modern day illness.**

Everyday our body expends energy to protect itself from toxins.

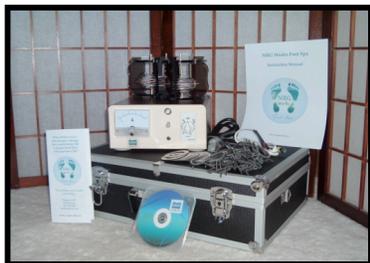

**The state of our health depends on the amount of energy we have.** In order to live healthy, vibrant lives, we need energy.

The NRG Works foot spa **detoxifies** and **energizes** your body so you can experience a renewed life of vitality and ease.

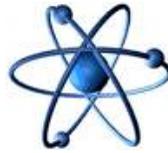

## What is the NRG Works foot spa?

**The NRG Works foot spa is a bioelectric device that utilizes electricity and water to detoxify and energize the entire body through the feet.**

The NRG Works machine consists of two water modules, an electrical transformer, twenty sets of extra keys and rings, an instruction manual and DVD, brochure, and durable carrying case.

## How does the NRG Works foot spa work?

**NRG Works is based on a very simple design.**

The foot spa consists of a module made of copper and stainless steel rings and a key connected to an electrical transformer with a built-in timer. The transformer converts electricity from the house into a 24 Volt DC output. The module is placed into a container of comfortably hot water. Feet are placed in the water and the timer is set to 40 minutes. The electricity runs through the wire attached to the key and rings, generating an electrical current. This current moves through the water and creates a negatively charged bioelectric field.

### NRG Works energizes

When we put our feet into this water, a continuous circuit flows between our body and the charged water. Energy flows up into every cell in our body.

### NRG Works detoxifies

Toxins reside in a positively charged state when in the body. Because opposites attract, toxins are attracted to the water's negative field and are drawn out of the body through the large pores in the feet.

### NRG Works was designed for the feet

because the feet naturally function to aid the body in its detoxification process. The feet also contain some of the most powerful acupuncture and reflexology points in the body. These points correspond to specific channels that carry energy throughout the body. NRG Works foot spa treatments stimulate these energy systems while detoxifying the body.

## Why does the foot bath water change color?

Color change of the water depends on two

main factors: the solute/mineral content of the water itself and the toxic substances being drawn out of the body through the feet. Many people get excited about the color change; the most important part of the treatment however, is the effect it has on the body.

## What are the benefits of using the foot spa?

### Energy

♥ People have experienced increased energy, clarity of mind, calming of emotions, and heightened physical well-being.

### Healing

♥ Energizing and detoxifying the body has enabled people to heal more effectively and at a faster pace from various injuries and illnesses.

### Vitality

♥ Many people who have used the foot spa for several months or longer have noticed they not only *feel* younger, but they *look* younger too. NRG may have an anti-aging effect on the body.

## What kind of scientific studies have been conducted regarding the health benefits of NRG Works?

Blood samples taken from clients before and after receiving foot spa treatments have demonstrated significant improvement in clients' cellular health. The

samples showed coagulation and disfiguration of the plasma blood cells before treatments. After treatments, the cells were differentiated, round, and hydrated. These results help confirm the energizing and detoxifying effects of the foot spa on the inner domains of the body.

## Is the NRG Works foot spa right for YOU?

### You cannot use the foot spa if you:

- ♥ Are pregnant
- ♥ Have a pacemaker
- ♥ Have a transplanted organ(s)
- ♥ Are under the age of four
- ♥ Have epilepsy

We do not recommend that you use the foot spa while undergoing chemotherapy or radiation. However, it is believed that the NRG Works foot spa enhances most medical treatments and aides the body in its natural recovery process.

**The maximum time one can use the foot spa is 40 minutes every other day.**

To learn more about the NRG Works foot spa, call us directly and we will be happy to assist you☺

## Testimonials

"I had Lupus, Arthritis, Hepatitis C and I was 40 lbs. overweight, which I attributed to the "just getting old" theory. I tried supplements of every kind to alleviate the pain. Nothing helped. I found the NRG foot spa at a health fair and after the first treatment I noticed the pain in my body was reduced! One year later, after using the foot spa once a week, all of my symptoms have vanished PLUS I dropped 40 lbs.!"

- I.M. Ashland, OR.

"I was very ill from chemical exposure. Any treatment I tried, whether chelation therapy, supplements, even plain old vitamin C, made me deathly ill. I finally found this footbath. I felt tremendous results within an hour after taking my first footbath. I continued treatments every other day for one and a half years. Now I have my health back and I am a new man."

- G.N. Portland, OR.

"In the area of general physical health, we have seen vitality improve greatly in certain areas of the body - 10 - 30% in a single treatment is very common. Nerve functions have normalized from anxiety to calmness in just one session, brain clarity has been noted by others."

- S.R., RN, MS Portland, OR.

"I have been taking the foot spa treatments every couple of days for over eight months. I notice that I feel calmer, more at peace, my skin looks brighter and healthier, and I have more energy than normal. I usually have extremely painful menstrual cycles; I have not experienced this since I began treatments."

- S.S., Santa Barbara, CA.
